

Fall 2021 EC101 Introductory Microeconomic Analysis

Teaching Fellow: Masyhur Hilmy

Student comments

- "Best TF I have yet. Seriously hands-on and really knowledgeable. Always available to provide quality help to his students. Is well prepared for discussions and again hands-on, meaning he knows exactly what we discussed in the lecture."
- "Masyhur was an excellent TA. His class really helped me to better understand the subjects covered in the course. He was thorough in explaining concepts and was always available to help whenever I needed it."
- "I am not going to lie, I learn way more from the discussions than the lectures. My TA explains the topics and concepts way simpler than the professor does. I also really like the google doc practice sets he does. They help a lot."
- "He was available after discussions and during office hours ready to help. I liked how he was able to break down concepts into easy numbers to understand the concepts and why things happen."
- "He cares about his students."
- "He's a person who cares about his students and has a strong understanding of economics."
- "He is nice and welcoming to teach anybody. He breaks down concepts to be understandable and his practice sets are nice before the quiz."
- "He was very good at explaining things that I was confused about. He used useful examples to make concepts easier to understand. I really liked how he gave us practice questions on google forms every class. They always helped me with the quizzes."
- "Very helpful to attend this class before a quiz. Takes the time to explain things slowly and in detail unlike the lecture."
- "We always review important information from lecture. He tries to answer our questions in depth with examples."
- "He is a really good TF and person. He will become a good professor or whatever he is pursuing in the future."
- "Does a great job explaining concepts and the quizzes are relevant."
- "I hated economics in high school so in coming to this I expected to hate my life and this class. However, this professor has been the best professor I have ever had. He gets straight to the point and explains everything clearly above all that the notes he posts are perfect and extremely helpful in studying. This professor has made me want to study economics as this class greatly helped me understand the world in a new way."
- "Very good discussions, made lectures easy to understand and explains all concepts well. Also very good at answering questions."
